

Amendments to and Listing of the Claims

This listing of claims supersedes all prior listings of claims. Please amend the claims as set forth below:

1 1. (currently amended) A method for operating a video processing apparatus,
2 said video operating apparatus being capable of operating in a video-operating mode,
3 and in at least one other mode, said video processing apparatus having an electronic
4 program guide operable in said video operating mode and not in said at least one other
5 mode said method comprising the steps of:

6 operating said video processing apparatus in said at least one other mode,
7 comprising operating a computer application software program on said video
8 processing apparatus, said computer application software program capable of receiving
9 electronic messages, said computer application software program having a display;

10 receiving, while said computer application software program is running, an
11 advertisement associated with a broadcast television program;

12 causing said advertisement to be displayed by said computer application
13 software program in an area of said display;

14 receiving a signal selecting said advertisement; and

15 operating said video processing apparatus in said video operating mode for
16 obtaining the broadcast television program in response to selecting said advertisement.

1 2. (original) The method of Claim 1, wherein said computer application software
2 program is one of a productivity and communication application software program.

1 3. (currently amended) The method of Claim 2 wherein said advertisement
2 comprises control information associated therewith, said control information, when
3 received by a video processor, causes the video processor to operate in accordance
4 with said control information, said control information comprising at least one of (1) time
5 and channel selection data and (2) recording data.

1 4. (original) The method of Claim 3 wherein said control information comprises
2 program data, and wherein time and channel data is determined using an electronic
3 program guide in response to said program data.

1 5. (previously presented) The method of Claim 1 wherein said step of operating
2 said video processing apparatus in said video operating mode comprises controlling a
3 video recording device, interconnected thereto, to record a program associated with
4 said advertisement.

1 6. (currently amended) A method for operating a video processing apparatus
2 comprising the steps of:

3 operating a computer application software program on said video processing
4 apparatus, said computer application software program being one of an electronic mail
5 message program, an instant messaging program, a web browser and a productivity
6 application software program, and having a display;

7 receiving, while said computer application software program is running, an
8 advertisement associated with a broadcast television program;

9 causing said advertisement to be displayed by said computer application
10 software program in an area of said display;

11 receiving a signal selecting said advertisement; and

12 operating said video processing apparatus in a video operating mode in
13 response to selecting said advertisement.

1 7. (previously presented) The method of claim 6, further comprising, after said
2 step of receiving a signal and before said step of operating said video processing
3 apparatus in a video operating mode, providing a plurality of choices, and receiving a
4 signal selecting one of said choices.

1 8. (previously presented) The method of claim 6, wherein said computer
2 application software program is an electronic messaging program.

1 9. (previously presented) The method of claim 6, wherein said productivity
2 application software program is one of a word processing program and a spreadsheet
3 program.

1 10. (previously presented) The method of claim 6, wherein said step of
2 operating said video processing apparatus in a video operating mode comprises at
3 least one of: immediately tuning a receiver to a channel that the broadcast television
4 program is on, setting a receiver to tune to a channel that the broadcast television
5 program is on when the broadcast television program starts, and setting up recording of
6 the broadcast television program in the future.
